## NEWS FROM CROPLIFE SA

**(All chemical manufacturers, Suppliers and Formulators)**

There is a renewed focus from government on waste management. It is important that all companies have systems in place to dispose of pesticide waste and empty containers of whatever nature responsibly. Take note that this is waste generated (if any) at manufacturing facilities, formulation plants and warehouses.

Please respond via e-mail to Dr Gerhard Verdoorn at [nesh@tiscali.co.za](mailto:nesh@tiscali.co.za) indicating the following:

1. Does your company have an arrangement with a licensed hazardous materials disposal company such as Interwaste, EnviroServ, Oricol, WasteMan, Waste Giant, A-Thermal or any other to dispose of any generated pesticide waste?
2. Does your company make use of CropLife SA approved collectors/recyclers for managing empty containers?
