SEPTEMBER 2015

NOTICE!!!!

NOTICE TO ALL MEMBERS: (URGENT)

There seems to be an inherent acceptance of allowing a non-qualified person or trainees to do an unattended inspection for WDO and then in the event of a finding (At a non-qualified level), initiate a call for expertise attendance.

It is our standing that the trainee or unqualified person is at a disadvantage and in fact severely compromised in that there is arguably not enough expertise or history or qualification to identify any number of contributory factors, let alone activity or the application of diligence in doing a proper and thorough inspection. The compromise to the customer has proven to be even more severe.

Whilst it may be so called accepted practice in other industries to send a "handlanger" into the inspection space, we as SAPCA do not endorse this nor accept this as standard/common practice.

Our published SAPCA promise to the customer is that the inspection and reporting will be done by a qualified WDO inspector only.

The issuing of SAPCA Clearance Certificates, insists that the signature at the bottom of the Certificate is that of the WDO Inspector that completed the inspection at a level commensurate with SAPCA published standing.

SAPCA does not condone nor give permission for the use of Post-Partum (PP) representation.

Your co-operation in this regard will be much appreciated.

Many thanks

SAPCA Management
