

METHYL BROMIDE REGISTRATION AND PURCHASE GUIDELINES FOR USE BY MB DISTRIBUTORS, DALLRD & PCO's

General requirements;

1. All PCO's must complete and sign a declaration form with their local MB distributor valid for a year from date of approval before any cylinder can be purchased from the supplier.
2. Completed declaration form shall immediately be emailed to DALRRD (IS) by the supplier after the PCO has met all the registration requirements with the distributor.
3. Once the completed declaration form has reached DALRRD (IS), the PCO can now apply for purchase of new MB cylinder with DALRRD (IS) using the relevant application form.
4. Every cylinder purchase under each usage category (Mills, Structure, QPS or ISPM15) shall be approved by DALLRD (IS) based on submission of declaration form, application form for MB cylinder purchase and submission of usage record report of the cylinders currently in use by the PCO.
5. No new MB cylinder shall be purchased without supplying of usage records of cylinders currently in use by the PCO, unless the PCO is a new buyer.
6. Once approval for purchase from DALLRD (IS) is issued to the PCO, the PCO can proceed to purchase the cylinder with the supplier.
7. Only a maximum of 2 cylinders per one usage category can be purchased by the PCO. In cases where the fumigation job requires gas exceeding the maximum cap per PCO, the PCO can submit a special request where special permit with special conditions will apply.

Specific requirements for QPS

1. Every QPS fumigation job shall be applied for and approved by DALRRD through the QPS application form. Applications can be made either by the PCO, owner of commodity or their agents.

Take note of the following forms;

Form DC1 = Methyl bromide Declaration form

Form MB1 = Application for Methyl bromide purchase

Form QPS1 = Application form for QPS job
